

reflecta DigiMicroscope WiFi 2.0

The **DigiMicroscope WiFi 2.0** impresses with its versatility. It can be used both as a wireless handheld microscope and mounted on the included gooseneck stand. This allows it to be fixed in any conceivable position. Magnification factors from 50x to 1000x can be set. In addition, the microscope can be focused to infinity, which opens up completely new applications.

Via WiFi connection, photos and videos can be taken conveniently and easily via an app without any vibrations. The eight continuously dimmable LEDs ensure shadow-free illumination.

The microscope is very versatile and can be used, for example, to examine plants, insects, coins, stamps, jewelry or even electronics.
